(Received 12 October 2008; accepted 8 November 2008)

Because of my carelessness, Eq. (1) in the paper “An approximate method for calculating the fluid force and response of a circular cylinder at lock-in” (*China Ocean Engineering*, 22(3), 2008, pp.373) should be $\frac{f^* - 1.0}{U^* - 5.0} = \frac{f_{\text{lower}}^* - 1.0}{5.75f_{\text{lower}}^* - 5.0}$, not $f^* = U^* / 5.75$.

My apology is hereby given.
